 GREGORY J. TOANLEY, JR.
 PRIMARY EXAMINER

Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1-16 recite, inter alia, a superconducting magnet electrical circuit comprising a superconducting coil assemblage including a plurality of spatially separated and geometrically symmetric main magnet coil portions connected in series to form at least one main coil series circuit and a plurality of spatially separated and geometrically symmetric secondary magnet coil portions connected in series to form at least one secondary coil series circuit so that said main coil or said secondary coil circuit will have an exact same current in the coils during a quench, keeping interactive forces among the coils symmetrically balanced, at least one temperature limiting circuit connected with the superconducting coil assemblage selected from the group consisting of a quench heater circuit or a quench resistor circuit and a superconductive switch coupled with the superconducting coil assemblage.

Huang et al discloses a similar configuration but does not disclose that said main coil or said secondary coil circuit will have an exact same current in the coils during a quench, keeping interactive forces among the coils symmetrically balanced.

The references of record do not teach or suggest the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
